Subject: Public Notice: Temporary Use Permit 2C 15 (published in the Comox Valley Record, Tues. Nov. 17/15)

To: Alana Mullaly, Manager of Planning Services, Property and Development Services Branch -

I most strongly object to the Courtenay and District Fish and Game Protective Association's application for a TUP which includes hinges on access to Comox Lake.

Comox Lake is our drinking water source, and far from allowing another 3 years' access to the lake for boating, swimming, floats, special events, recreational facilities, etc. those in positions of authority should be moving to LIMIT the access to our watershed, not permit continued access to it.

Moving to change what has been 'tradition' is never easy, but surely events of the past few months should make it crystal clear that now is the time to start making the tough decisions that will ensure the protection of our most precious resource: safe, clean drinking water for the Comox Valley. These decisions will necessitate a major change in the way Comox Lake is viewed, and used. It must be thought of not as a recreational area, but as the most vital component of healthy, sustainable life in our area: a precious resource to be managed carefully, and protected.

Please do what is right, and move in the direction of protecting Comox Lake. Do not approve this application for permit.

Sincerely,
Ann Robertson
Resident of Courtenay
