RE: Merville Fire Hall Construction: Notice of Award

Purpose

To provide an update regarding the procurement process and Notice of Award to the successful construction firm for the construction of an auxiliary fire hall in Merville.

Recommendation from the Chief Administrative Officer:

This report contains no recommendations. It is for information purposes only.

Executive Summary

An Invitation to Tender (ITT) was published on May 11, 2021, for the construction of an auxiliary fire hall located in Merville. At the close of the ITT on June 24, 2021, the regional district had received one compliant bid from Kinetic Construction Ltd at a value of \$1,317,123 excluding GST.

Although seven construction firms were represented at the site visit, it was noted that this is a very busy construction season and the regional district was notified by some firms that they would not be able to submit a bid.

As a result of a competitive process, and on the recommendation of the project engineer, a Notice of Award was issued to Kinetic Construction Ltd.

Construction is anticipated to begin in July 2021 with completion early in 2022.
