Comox Valley Regional District

Re: Public Hearing Water Bottling Application
Sackville Road, Merville BC

Dear Directors:

signature *and*

We are in opposition to the application to approve this water bottling plant:

1. It is not a permitted use under current zoning bylaws and the Official Community Plan, nor is there community support. The K'omoks First Nation has specifically spoken against an approval in the face of their unceded water rights. The Advisory Planning Commission Puntledge –Black Creek (Electoral Area C) (APC C) and the Agricultural Advisory Planning Commission (AAPC) have also both opposed this application. The Agriculture Watershed Planning Advisory Committee: Tsolum River Watershed (AWPAC) has expressed concerns about cumulative impact on water supply in relation to this application. As well, much opposition from neighbours has been recorded.

This project has no environmental or economic value to the community at large. At 10,000 litres per day, this water application is enough for 5-10 homes, depending on family size and usage (270 liters per day average in BC), which would be the equivalent of a small subdivision in a rural area.

At 10,000 litres a day, if people are filling the standard large 18.9 litre jugs this would be the equivalent of about 500 water jugs a day. If there is a water shortage in the Valley in the future and there is a demand for this water, this rural road with no sidewalks or cycling lanes may see hundreds more cars a day. Once you make any temporary usages or amendments, you may set precedent and open up rural areas, with their cheaper land, to unsuitable development which violates community planning and undermines the rural community and its sustainable economic contributions to the economy.

2. The reality of climate change is likely to contradict the data the Ministry used for its decision to issue the licence. Making decisions on perpetual never-to-be-extinguished water licences, on the basis of data from as far back as thirty years is a dangerous flaw in the face of the tsunami of climate change that is rapidly approaching. Why is it not standard practice to include a scenario which includes the effects of climate change in issuing such a licence? As Fred Fern pointed out, continuing high levels in the aquifer may be due not to regeneration, but rather to the melting of the Comox and other glaciers that, once melted, will never be regenerated.

The BC government's own research indicates that:

“BC has become warmer over the last century ... Lake ice lasts a shorter time.... Spring snowmelt and runoff is starting sooner and is followed by increasingly long, dry summers in south-central BC (Leith and Whitfield 1998) and south coastal BC (Pike et al. 2007)... suggest that by mid-century, BC will be 1.8 °C warmer than it was in the 1960 to 1990 period ... By the end of this century (2070-2099), mean annual temperature in BC could be 1.7 to 4.5 °C warmer than the 1961-90 period Summer precipitation is expected to ... decrease more substantially in coastal BC. ... warmer temperatures will reduce winter snowfall (i.e., more rain) substantially in coastal BC (Figure 5). Spring snowfall will likely be substantially reduced across all regions of BC.... snow cover will contract and glaciers and permafrost will thaw (IPCC 2007; Meehl et al. 2007). Further, the depth and duration of the winter snowpacks in BC will likely decrease (Pike et al. 2008). Preliminary analyses suggest growing season moisture deficits will increase in several locations, particularly in southern and coastal BC (Spittlehouse 2008). Deficits occur where monthly precipitation is less than monthly evaporative demand (reflecting solar radiation, air temperature and humidity)... The frequency and duration of summer drought events are expected to increase over much of southern BC (Haughian et al. 2012). Precipitation is expected to fall in fewer, larger events (IPCC 2007), with consequences for ecosystem function (Knapp et al. 2008).”(2a_va_BC-Climate-change-final-aug30.pdf). *Climate Change in BC, Dave Daust*

So in the future we are going to have hotter, longer summers with less rain and warmer winters with less snowpack and more intense rainstorms. This is going to mean less water permeating into the aquifer as rainfall will be moving more quickly off the ground above the aquifer, and this effect will be increased as a result of more permeable surfaces accompanying increased development, widespread loss of tree cover and more drainage from both urban and rural areas.

3. The Ministry’s decision was also made without meaningful consideration of the effect of continuing aquifer withdrawals on Portuguese Creek and other wetlands in the Valley. The Ministry maintains that the creek is not fed by the aquifer, but rather through surface water only, but as GF Consulting noted in their report, *Review of the New Groundwater Application process for a proposed water bottling facility in Merville, BC (application by Christopher MacKenzie and Regula Heynck) May 2018*

“However, the well is artesian. Therefore, vertical migration of groundwater through a leaky aquitard could very likely be recharging a stream or wetlands. The assumption of absence of connection should be supported by a cross-section describing the aquifer, the confining layer (the aquitard), the piezometric level, and any intersection of the piezometric level with surface water bodies or wetlands (Figure 3). However, there is no supporting figures or illustrations confirming this assumption.” (page 11).

Sackville Road cuts across Portuguese Creek (which has been diverted under the road by a culvert), and many wildlife species travel along the creek’s riparian area. More cars travelling down this long straight road (where people seem to instinctively pick up speeds well past the posted 60 mph) will increase the danger to wildlife often seen crossing here: aside from the

multitude of creatures who travel along the creek area we have also confirmed identification for both Western Toads and Northern Red-Legged frogs present in the creek area. Western Toads are on the provincial Yellow List, as a species of conservation concern. One of the dangers to them listed on the BC provincial website is death crossing roads during migrations.

Northern red-legged frogs are listed nationally by the Committee on the Status of Endangered Wildlife in Canada (COSEWIC) for Special Concern and they are on the provincial Blue List as a species of special concern.

4. **Approval may set precedent for further application rezonings.** At the community meeting last week, the FLNR staff said that any water bottling application, including one from Nestle, would be considered within the parameters of the Water Sustainability Act.

The Council of Canadians reported that “In Ontario, Nestlé continues to pump up to 4.7 million litres (1.2 million gallons) of water every day on expired permits from its two wells in Wellington County, Ontario. Nestle has purchased a third well in Elora and could be given the green light to pump once Ontario’s moratorium on new and expanded bottled water permits ends in January 2019. The City of Guelph has raised concerns about the impacts of Nestlé’s water takings on the municipality’s future drinking water.” (<https://canadians.org/blog/water-flint-not-nestle>)

Do we really want to invite possible incursion from Nestlé into the Valley? There is a danger that if you permit this amendment or change the zoning to allow this use, you will be weakening any case against the next application.

5. **Approval may set precedent on a continental basis.** The spokesman for FLNR told the crowd that approving this application will not set precedent for future applications, but with respect, he was most likely not a lawyer, and we must make decisions on water with the full knowledge that as water becomes a more and more valuable commodity in the world, the US will doubtlessly throw their best legal minds at the urgent problem of how to get hold of Canada’s water. Changing NAFTA rules and other trade deals may make existing water bottling operations a commodity that must by law be permitted to be exported to the US. We simply cannot foresee how a decision here could have national repercussions. Municipalities, towns and regional districts must take responsibility for protecting Canada’s water, and your decision here is as critical – in its own way – as a federal decision.

The CVRD has an obligation to act independently to protect the Valley’s water and wildlife. In the face of too many risks and uncertainties, please refuse this application. Thank you for your attention to our concerns.

Frank and Gillian Anderson

Re:

Bylaw No. 543

My comments/concerns are:

- I do support this bylaw.
- I do support this bylaw, subject to the conditions listed below.
- I do not support this bylaw.

- Harm to fish
- River Didymos toxins

May need to use Sackville as a backup water source to CVRD. due to new info coming out about Rock Snot which forms a potentially toxic bloom & could affect our drinking water. This ~~is~~ could result in a do not use advisory where ~~the~~ water boiling ~~the~~ & filtration systems would not make the water safe to drinks. I have contacted specialists in the US & the BC Invasive Species Councils for ^{suppo} advice regarding my position.

I feel it is premature to ~~do a~~ approve a bottle water project when we haven't finished defining what we will need for our drinking water with new information coming out about Rock Snot aka Didymo + climate change

Our drinking water is fragile, it is not resilient. All our urban water is coming out of Comox Lake

A bottle water company w/ accelerate climate change. Nobody will be immune

We need to preserve our ground water sources for the public + common good ~~because~~

Re: Bylaw No. 543

To:

My comments/concerns are:

CC:

- I do support this bylaw.
- I do support this bylaw, subject to the conditions listed below.
- I do not support this bylaw.

Concerned with safety water and the build up of toxins ^{rock shot} that has potential to rise and contaminate our water shed. Boiling our water on a regular basis is not a wish or a acceptable future outcome. I just moved here from Comox 4 weeks ago, and I already save all the water I can every day from rinsing hands/dishes etc and use that water for plants outside. I can also drink water directly from our well which I would like to do and would like our grand children to do in the future. With

With the climate change and the rate of its impact on our rain in summer, snow in winter, we can see that it is all decreasing. This affects the watersheds everywhere, in north Van/West Van and it is having same impact here and our watershed is at risk.

It is my position as a resident used to take a safe and very needed time frame to assess the needs of water in the coming 10 and even 20 yrs because that will better inform how our environment is affected by climate change.

* I propose to ~~vote~~ no to propose Bylaw for rezoning and for the bottling water project.

Data relevant to the present climate change is required and should be gathered in next 10 to 15 years and not use old, irrelevant data for such an urgent matter.

Let's protect our watershed.

Vote No

Watershed in Trouble

- cc^a
- I believe that water must be viewed as common public property and disagree with it being sold.
 - I believe our zoning must be respected and that this change would fail to do that. The area is residential not industrial.
 - I believe it is ^{& would be a} dangerous precedent to grant bottling of water alone as it may open up opportunity for acquisition for big business & whole sale water sale.
 - I believe that this business adds no value as say, using the water to produce pickles or beer ^{or coffee} would do and as such, limits the st amount of potential economic development. ^{less} jobs
 - Considering that we are even now entering what seems to be global warming (and may prove fatal to us all) I believe

We should consider this and would ~~not~~ hope the Board would choose to favour the principle of Caution in their decision and not support this rezoning application.

I lived for seven years on the next door property 78-85 and I believe the owner of that property who asserts that when water was pumped from a well drilled nearby to supply water for some fish having difficulties with a dry spell, that his well went dry for the first time in 15 yrs. Bear in mind that this happened during a dry period. I assert that the residents of the area have a previous claim and that water should not be sold.

I believe that should there be as much water as purported it ~~should~~ could serve better to use surplus for agriculture which is allowed in the present zoning and would have much more relevance to the community.

Once again I believe that the zoning should be respected! The families in the area have assurances from their zoning and this ^{zoning change} will have the affect of changing their lives and enjoyment of their properties. Some small changes would not but this one certainly would please deny it

My comments/concerns are:

- I do support this bylaw.
- I do support this bylaw, subject to the conditions listed below.
- I do not support this bylaw.

REGIONAL STAFF + DIRECTORS :

THIS IS AN OPPORTUNITY TO EMBRACE A
SUSTAINABLE FUTURE. WATER THE MOST PRECIOUS
AND MOST REQUIRED, DAILY - IN FACT, NECESSITY FOR
ALL LIFE. ALL LIFE SEEKS WATER - IS A MANDATORY
'COMMON' NEED: THE COMMONS MUST NOT BE SOLD.
WITH COMOX LAKE: WE HAVE NEW RESPECT FOR
THE FRAGILITY OF OUR ACCESS TO QUALITY WATER.
THE WATER CYCLE IS A CLOSED SYSTEM - THE
AVAILABILITY, AS ARE ALL THINGS IN THIS
WORLD, ARE SUBJECT TO CHANGE!

Climate CHANGE IGNORED; I DISAGREE
THE PAST RECORDS REFLECT WHAT THE
FUTURE WILL PROVIDE.

IE WHAT IS THE IMPACT ON AQUIFERS -
WITH A COMPLETE CHANGE - TO SNOW PACK,
PRECIPITATION, HOTTER TEMPERATURES -

OUR COMMUNITY MUST SHIFT AND RESPECT
THE NATURAL CAPITAL - ADOPT A POLICY
TO BE FORWARD THINKING - LIMIT OUR
WATER - FOR THE USE OF THE LOCAL
RESIDENTS, THE COMMUNITY.

PLEASE REPRESENT THE FUTURE, AND DO
THE RIGHT THINGS.

* THE LIMITS TO GROWTH ARE REAL + CURD OUR COMMUNITY'S
AGENTS!
Respectfully / LEROY

IS BPM ATTENDING THE ZONING MTG -

WHAT I HEAR THE COMMUNITY SAYING IS NO
AS ARZEENA SAID - WATER IS NEEDED
FOR MANY USES - MOSTLY FOR FOOD
PRODUCTION

Re: Bylaw No. 543

My comments/concerns are:

- I do support this bylaw.
- I do support this bylaw, subject to the conditions listed below.
- I do not support this bylaw.

Water should not be bottled for sale. There are many instances where the commercialization of water has created severe hardships on long term residents. Plastic containers are filling our oceans and killing sea life.

It is additionally shocking to learn how much water is used in the preparation of bottles - not even available for consumption. We can all fill water bottles from our Taps.

The water sustainability act needs to be amended. Climate change is significantly affecting water supply. Glaciers are melting and future supply is uncertain.

Farmers need water to produce our food and should water sources dry up, not just here but in many/most places worldwide we could be in real trouble. Food should take precedence over the sale of water.

Bylaw No.

543

My comments/concerns are:

- I **do** support this bylaw.
- I **do** support this bylaw, subject to the conditions listed below.
- I **do not** support this bylaw.

There is no reason why this land owner has any right to change a law that was in place and all land owners have abided by.

I feel the applicant is not considering this community but is looking to profit on a resource that does not belong to him.

I am most concerned as to where this will lead as an equity producing business.

With changing times, water will become a valuable commodity - nobody →

From our community for decades back,
chose to profit off their neighbour's
water.

I oppose the bylaw.

CC:

~~Regarding only -
precautionary approach.~~

~~any else - zone 8 - allowed - in area
water sustainability act?~~

~~Request Board - review existing bylaw. which does allow water
- Zoned industrial is the issue - building~~

~~'Privatization of water' = encourage change water sustainability~~

NO DO NOT change bylaw

Be advised for any proposal - it is the

board of directors to take under
advisement the message so loud
and clear. You may be faced
with this again & again - Save
the water for the people - not Commercial
Climate change is here.
We have children - their future
depends on a liveable environment.

6. The Director have the authority to refuse the application based on both the law and its reasonable interpretation.
7. There is no necessity to agree, by to CRD or elected officials now or in the future.
8. There is no clear benefit to the general population and economy; and at the same for similar perspective, there is no assurance of the safe conservation of the resource.
9. The public in its full reason and as an expression of vast consensus is thoroughly concerned and opposed.
10. There is no adequate watershed plan, adequate groundwater assessment or update in view of climate change, trends and projects.
11. The First Nations are opposed - this is needed land, and will diminish the value of their treaty agreements for settlement.
12. Many experts, local, Provincial and national, disagree with the principles of "water for sale", instead of its conservation as a public resource rather than commercialized resource for private benefit.
13. There is no evidence backing up the applicants' proposal that there is "no risk"; this is unsubstantiated personal opinion. There likewise is no proof submitted by the applicant that the extraction of water "is sustainable".

My comments/concerns are:

- I do support this bylaw.
- I do support this bylaw, subject to the conditions listed below.
- I do not support this bylaw.

To:

CC:

My home on Fern Road is supplied by water from a 25' shallow well. The water is of excellent quality, not very hard, pH 6.5. It has sustained me and my family for the 18 years I have lived there. May this continue for a long time to come -

My concern with this bylaw is that if approved, it will facilitate the ~~removal~~ commercial removal of water from an aquifer that is a commons - i.e. owned by us all, and shared by us all. Despite government assertions to the contrary, there is no guarantee that such large extraction by a single user (for personal profit to himself alone) will not adversely affect the availability of water for us all.

OVER →

Many, many aquifers around the world have been negatively impacted by large draw downs for commercial & industrial purposes. Why would our aquifer be any different?

We must take the precautionary principle, and deny this rezoning application. The potential risks of endangering our water supply — especially in these times of climate change & the increasingly unpredictable availability of ample water in many places on earth — are simply not worth it.

I urge the directors to employ the precautionary principle and deny the rezoning application.

Thank you,

JUL 23 2018

I am against and do not support this bylaw # 543
Obvious changes to our climate are part of my reason to vote
"No". We see a reduced ice pack on Forbidden Plateau
Glaciers - our creeks are unable to sustain current fish fry
and yes it is about my water source - a shallow well -
When the applicant said "its hit and miss" as to who loses
their water source and "if you those with shallow wells want
water they should dig a deep well and tap into the aquifer.
Why should my family suffer financially so the applicant can
gain financially? A price of \$15-20,000 to dig a deeper well
(times how many of us) will be taking out loans and
mortgages to pay for new wells. - Thank you Norma

my family has owned a water license & since
the 1960's - We were advised in 2017 to
reduce our consumption because of draught.

Just want to add I live by Mulligan's Golf course when they came to be from a 90 acre producing farm to a golf course we lost our water in the summer - did another well & then had to do a 3rd well They have very big pumps & pump about the same as these people are proposing every day - I have very many trees die, my land is ~~now~~ changing from the am't they take - my fields are full of golf balls in agricultural land and the language from the

golfers can be pretty bad - finally stopped them from using our fields for toilet by removing the bush

I hope that there can be something done about this sachin's water license can be retracted

Re: Bylaw No. 543/2781

My comments/concerns are:

- I do support this bylaw.
- I do support this bylaw, subject to the conditions listed below.
- I do not support this bylaw.

The bylaw reason for change is profit, the reasons for the original bylaw was to enact a vision for the future, to protect water for future. Water bottling on Vancouver Island is a short sighted money grab. There is nothing to stop the owners from selling their licence to poke etc.

We may have enough water in the island fives, if we don't sell it off. (the F) There is no way to bring it back - An aquifer is finite with global warming.

I believe it would be extremely short sighted to change the zoning, the protest will be draining a great deal of water for their new aquaculture production. It is not known how much that operation will take. →

Also the entire advisory board voted against granting this change.

Council first nations also advised denying the permit change.

I cannot see any reason to approve this zoning change and in the face of the overwhelming public advisory council & first nations opposition; it begs the question what is the motivation of the CVRD to even consider approving this -

I would encourage the CVRD to REMOVE water bottling from the light industrial zoning completely and for Enact a bylaw that charges dearly the company or persons who take advantage of the law that allows water bottling - for every drop that is bottled -

Water is not, cannot be taken as but one person / company & leave the rest of us thirsty unable to water crops, grow food -

Comox Valley Regional District
RECEIVED

File:
JUL 23 2018

My comments/concerns are:

- I do support this bylaw.
- I do support this bylaw, subject to the conditions listed below.
- I do not support this bylaw. re-zoning application

- water is already scarce
- the community is residential/Agriculture
- this rezoning sets a dangerous precedent
- conditions are not easily enforced
- Most wells in area are shallow (contrary to drilled wells used in provincial gov't study) and may be impacted.
- increased traffic on rural roads where kids are often present

- the Committee should respect the consistency of the CVRD zoning plan

- the approval of this ~~zone~~ rezoning may lead to difficulty in opposing future increases in the amount of water drawn. (current license is for 10K l/day & is transferable)

My comments/concerns are:

- I do support this bylaw.
- I do support this bylaw, subject to the conditions listed below.
- I do not support this bylaw. rezoning application

- water is a public resource, why should one person benefit from it? Especially as the climate is changing and water restrictions are becoming more common.

- how can it be known that this ~~op~~ operation will not effect shallow wells in the community

- rezoning of this property sets a dangerous precedent for a beloved residential area

- one business leads to more, when will it end? how far will it be ~~water~~ developed? It will change the feeling of the community

- if the first nations of the area and the community don't want this why is it even being considered

Re: Bylaw No. 2781 - 543 - sackville Rd Rezoning of # 2410

My comments/concerns are:

- I **do** support this bylaw.
- I **do** support this bylaw, subject to the conditions listed below.
- I **do not** support this bylaw.

We live on sackville Rd and do not support this Rezoning -

- until there is a Fire Department that is available to the Community that may benefit from the aquifer the sale of water is not in my best interest

- we have lived there since 1975 + moved to the area for the rural + agricultural atmosphere. Not to have the business of business

- we are on a shallow well + have NEVER run out of water + we would like it to stay that way IF we should run out after the Rezoning I feel the CURD will be responsible + should compensate us.

Gloria Cashman

I WAS A GEOLOGIST IN THE OIL INDUSTRY +
DRILLED HUNDREDS OF WELLS. I KNOW THAT
DRILLING A WELL AFFECTS AQUIFERS FOR LONG
DISTANCES. AFTER PRODUCING OIL FOR A LENGTH OF
TIME, EVENTUALLY WATER COMES IN TO REPLACE
THE OIL WHICH WAS PRODUCED. THIS CAN SOMETIMES
TAKE YEARS BUT EVENTUALLY THE WATER COMES
IN WHERE THERE WAS NO WATER PRODUCED IN
THE BEGINNING. AND HAS COME FROM MILES AWAY

It is important to the local citizenry that the CVRD take into account the issues that were not addressed and not within the scope of the provincial ministry in its short-sighted approval.

These issues include:

- * Climate change impacts
- * Social license - ^{lack of} the concepts of local residents and the region who are overwhelmingly opposed.
- * Non-consideration of shallow wells in the vicinity of the property in question.
- * Water should be considered a human **RIGHT** not a commodity
- * opposition is vast

drawing an aquifer for private profit is unacceptable as we witness change of climate

There are alternative sources of water for privatization eg desalination of sea water

Regulation & zoning } government role is to protect people's interest generally & in view of the future not solely to advantage private individuals.

Area C's director has rec'd recommendations from local, provincial and First Nations consultees NOT to approve this application.

Please, honor these recommendations.

I also believe the range of other activities permitted on commercial zoned property are inconsistent with the designation ^{dreams} a rural residents living in this rural area in the AR have ~~ought~~ come to expect, and bought into.

I feel very strongly that this precedent should
not be set. This is a residential area and
should remain so. This is an agricultural area
and should remain so. Do not change the zoning
for one 'cottage industry'. Once changed, the
zoning remains with the property and could then
be sold on as such and possibly at great profit -
again benefitting one family. There is not
a benefit to the community, and not for
the common good.

Re: Bylaw No. 543 2410 Sackville Rd. rezoning

My comments/concerns are:

- I do support this bylaw.
- I do support this bylaw, subject to the conditions listed below.
- I do not support this bylaw.

Rezoning this property to light industrial is a big mistake.

This is a rural residential area, light industrial allows uses from auto body shops to pet crematoriums to many other incompatible uses. I expect the water bottling proposal will fail in a few years, then the property will be sold. A new zoning would be transferred to new owners and could allow any of the new uses. This is unacceptable.

My comments/concerns are:

- I do support this bylaw.
- I do support this bylaw, subject to the conditions listed below.
- I do not support this bylaw.

This is a rural area of farms & small acreages rezoning to light industrial would open up the area to other industries. Also, many families use this aquifer, and taking this amount taken from it would affect wells.

I do not agree to the rezoning.

I live next door to the proposed well.

Myself & my family survive from a shallow well approx 300 ft from the proposed well.

Our well will surely dry up as it relies on the pressure of the aquifer to provide for us.

The greedy attempt of a new neighbor to capitalize on a resource that so many families rely on.

I was born and raised at 7429 Rodger rd. If this is allowed to be built, it will surely have a very negative impact on the community.

The reasons for passing this bylaw are dependent upon the historical levels of water in the aquifer.

We all know, with the Glacier retreating, that these water levels will retreat in the future.

RE-ZONING THIS PROPERTY WOULD BE COUNTER TO THE
OCP AND REGIONAL GROWTH STRATEGY. THIS COULD OPEN
THE DOOR TO OTHER APPLICANTS DEMANDING TO OPERATE
COMMERCIAL BUSINESSES IN THE AREA. THE K'OMOKS FIRST
NATION OPPOSES THIS APPLICATION; THEIR VIEWS SHOULD BE RESPECTED
ALTHOUGH THE ISSUE OF WATER LICENSES IS A PROVINCIAL MATTER,
IT IS ALSO IMPORTANT FOR THE CURD TO SEND A
CLEAR MESSAGE TO THE PROVINCIAL GOV'T THAT RESIDENTS
OF THE COMOX VALLEY STRONGLY OPPOSE SELLING OUR
COMMON WATER. THE WATER SUSTAINABILITY ACT NEEDS
TO BE AMENDED TO PROTECT OUR WATER, ESPECIALLY
IN THIS TIME OF CLIMATE CHANGE RESULTING IN DROUGHTS.

* We have just moved to Courtenay after living on a rural property in Merrville. Having a well, water usage was always an issue - we constantly monitored how much we used - especially in the fall, when showers were few and far between!

This bylaw could be the "slippery slope" and sets a precedent that could be dangerous, especially as we are in a period of climate change - and an uncertain future - - -

The proportional relationship between the re-charging of the aquifer in question and the dwindling surface water (ie, rain, snow, ice) causes concern with us due to the proposed bottling business. Pressure on drinking water throughout the country let alone the world is increasing, MERVILLE included. Privatizing a natural resource sets a dangerous precedent. 10,000 litres is the asking amount. If demand increases (if this goes through) when and where does this approval get policed and the proposed amount cap out for withdrawal? Does a major international company buy this business out in the future?

Re: Bylaw No. 543

My comments/concerns are:

- I **do** support this bylaw.
- I **do** support this bylaw, subject to the conditions listed below.
- I **do not** support this bylaw.

Everyone wants to save the water, but where are they ^{getting} saving the water from. The proposal is also about sustainable distribution of a resource, instead of import a high valuable resource from somewhere else.
This proposal supports a global service. #

Re: **Bylaw No.** 543

My comments/concerns are:

- I **do** support this bylaw.
- I **do** support this bylaw, subject to the conditions listed below.
- I **do not** support this bylaw.

This rezoning is not compatible with the
OCP & would set a dangerous precedent
that zoning, planning & OCP can be changed
at will. The rural/agricultural nature of
the Sackville Rd area **must** be retained
and protected. Water bottling should not
be allowed in this rural residential area.

THE PROPERTY IN QUESTION IS
NOT SUITED FOR INDUSTRIAL ZONING
NOR IS ANY OTHER LOT ON
SACKVILLE RD. APPROVING THIS
REZONING WOULD ONLY OPEN A
CAN OF WORMS FOR THAT AREA.
COULD YOU IMAGINE A 24 HR
WOOD SHAKE MILL ON THE SAME
ROAD. THE REZONING / ~~STAYS~~ WATER LICENSING
STAYS WITH THE PROPERTY EVEN WHEN THE
OWNER SELLS THE PROPERTY.
IN THIS SITUATION THIS SHOULD
ALSO BE CONSIDERED

Re: Bylaw No. 543

My comments/concerns are:

- I do support this bylaw.
- I do support this bylaw, subject to the conditions listed below.
- I do not support this bylaw.

This is not fair to neighbours, noise, traffic, dried up wells, creeks etc.

I will be so disappointed if our elected politicians put this through.

~~But~~ All people I have spoken to are against this bylaw No 543, too bad not all will voice their opinions.

L Kennedy

To the Directors, Comox Valley Regional District:

The petition of the undersigned, states that: The existing zoning of the property at 2410 Sackville Road is RU-8, therefore residential property in an area surrounded by ALR properties. The zoning should remain residential and therefore should not allow a water and beverage bottling facility. The proposed change in zoning would disrupt the neighbourhood and would not be compatible with the rural and farming nature of the surrounding properties. The existing Regional Growth Strategy of the Comox Valley Regional District does not include policy regarding the commercial sale of groundwater. The undersigned oppose the commercial sale of groundwater and therefore look to the CVRD to include policy to preclude the commercial sale of groundwater in the Regional District.

Your petitioners respectfully request of the Comox Valley Regional District Directors that the current application for the rezoning of 2410 Sackville Road be denied to retain the residential/agricultural nature of the area, and further request that you address the bottling of groundwater for commercial sale in the Comox Valley Regional District in the CVRD Regional Growth Strategy to implement sustainable groundwater management that takes into account the cumulative impacts in our watersheds.

Dated this 17th day of July, 2018.

Bruce Gibbons

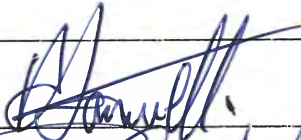

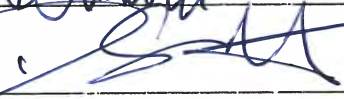

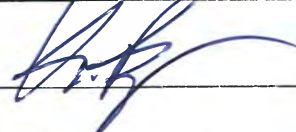

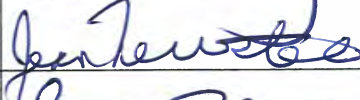

2470 Sackville Road

Merville, BC V0R2M0

**Protect Water for the Community of Merville

**Protect Water for the Community of Merville
Petition to the Comox Valley Regional District Directors**

We, the undersigned, request that the current application for the rezoning of 2410 Sackville Road be denied to retain the residential/agricultural nature of the area.

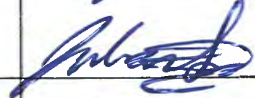

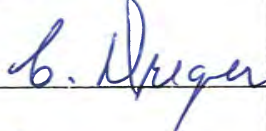

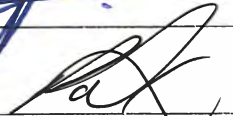

We further request that you address the bottling of groundwater for commercial sale in the Comox Valley Regional District in the CVRD Regional Growth Strategy to implement sustainable groundwater management that takes into account the cumulative impacts in our watersheds.
