Chair and Directors  
Comox Valley Water Committee

**Re: Comox Valley Water Treatment Plant**

I ask for the director's consideration of the following:

WHEREAS the introduction of the Ultra Violet Filtration has reduced the likelihood of boil water advisories by 80 per cent;

AND WHEREAS there were no boil water advisories this past winter;

AND WHEREAS Island Health has allowed the tolerance level to be temporarily raised;

THEREFORE BE IT RESOLVED THAT the board direct staff to review whether the planned water treatment plant is still required;

AND FURTHER THAT if the planned water treatment plant is required, whether or not the size of the facility can be reduced.

Respectfully,

***E. Eriksson***

Erik Eriksson  
Director
