Subject: 006-285-929 Sawmill

Hi Jodi

In regards the variance of the above, my only concern would be operating hours. In the summer time, he starts that sawmill at first light which is much too early as it is a very, very noisy operation! Again, in the summer during hot weather, he will run that sawmill until dusk...much much too late to be listening to such a terribly loud noise.

Regards,

Jane Neve
