Bylaw No. 520

Comox Valley Regional District
RECEIVED

AUG 28 2019

My comments/concerns are:

☐

I do support this bylaw.

☒

I do support this bylaw, subject to the conditions listed below.

☐

I do not support this bylaw.

File:

- Rural Kitchens ARE very important
- STOPPING People From Living in R.V.s, Buses & Sub Standard Shelters w/ Living in Tents By Sewage Treatment Plants.
- Setting Bylaws By Area is important, what we can't do on A 1/3 of Area would be quite acceptable on larger lots.
- IF you want to control parking on roads control that not restricting # of employees allowed in a Home Based Business.
- I Support the Elimination of new water bottling for Profit Enterprises.

INDICATE THAT I ^{STRONGLY} SUPPORT PROHIBITING
SELLING AQUIFER (GROUNDWATER) WATER AS
BOTTLED WATER.

August 28, 2019

Comox Valley Regional District
550B Comox Road, Courtenay

Re: Public Hearing - Comox Valley Zoning Bylaw No. 520, 2019

We support and commend the proposed changes to this bylaw to prohibit a water and beverage bottling facility within the CVRD. In the face of changing environmental conditions all over the world, this is an ecologically responsible reflection of both the local and international concerns of scientists and citizens about water shortages due to climate change and the over-drawing of groundwater.

The health of all of our Comox Valley waterways and their dependent wildlife requires plentiful water, and protecting our ground and surface water from overuse is a sound planning tool.

Thank you for your attention to our concerns.

Sincerely yours,

Frank and Gillian Anderson

☐ I do not support this bylaw.

We support the bylaw the CURD is to pass
regarding to prohibit the bottling of ground
water.

We applaud the CURD taking this issue
with the seriousness it has deserved. Through a process
which started for us in February 2018 when it came
to our attention our neighbour proposed to utilize a
water bottling permit that had been issued by the
provincial gov't. the year before. While at first it appeared
the province could approve this activity, as the process
moved forward there was significant details local
gov't could take control of. This has been a long drawn
out event for all concerned. We feel our local

representatives have been forward thinking
i have shown our provincial gov't that a few
vague charts of ~~static~~ statistics regarding our
aquifer is not enough to permit commercial sale
of ground water. As we move ahead dealing
with aspects of climate change, ^{we are} needing to have
a social conscience as well as gathering hard data.

re: 312 \$5,000 + an onsite sewage disposal system to live on one's own land while building may limit people (even further) from getting 'landed'. IMO some people remain in jobs that are destructive. (ie fish farms) in order to afford the multiple & proliferating costs. Encourage diversity of backgrounds in order to avoid a mono culture of only rich people here please.

re: 309 ^{accessory?} No kitchens in out buildings! Please re work your definition of 'kitchens' to ^{needed} continue to allow the myriad variations of parts of kitchens to allow studios, work-shops, tea facilities, fridges in greenhouses, stoves for crafts... to continue!

Re: Water bottling - I am also 100% against water being bottled and sold for profit! (except for local community use when in need, ie wells drying or polluted as in purchasing the service of providing water [not the water itself] from 'Water Pure & Simple' in these cases and also in 5 gal bottles for events where tap water is insufficient or unavailable. Please, in this time of climate crisis exercise precautionary principles to preserve ^{our present} the resources for local communities, families, agriculture and for those to come.
